The Company

Eze Badge is the original do-it-yourself personalization and doming package.

In three easy steps the Eze Badge product line enables you to produce professional domed products.

The Eze Badge product offering consists of:

- Market leading easy-to-use software
- Over 25 insert sizes (and growing)
- Over 100 quality accessory products
- Point of Sale material and online services

Whatever your personalized product requirement – think **Eze Badge!**

The Process — EZE AS 1,2,3

Create and personalize your design using our bespoke template based software.

- 1 Print** out on pre-cut Eze Photo stickers that match the design template
- 2 Pick** your accessory product
- 3 Stick** the photo sticker on your product and stick the adhesive dome on top

The center piece of the product range is the **Eze Dome**, the ready-to-use clear dome sticker.

Photo Stickers

The white photo paper is semi-gloss photo paper and is specifically designed for dome application. Print will be water proof. Applying the dome will provide UV resistance.

The gold and silver paper have a matt brushed metal effect. They are designed to be used without the dome as stand alone name plates or labels. Applying a dome will give a high gloss effect to the metallic paper but the dome must be applied carefully to avoid substrata marking. The gold and silver paper is not water resistant.

Accessories

Plating Designation of Metal Accessories

All metal products are available in standard gold and silver plating*. Please designate the plating finish required by adding "G" or "S" respectively at the end of the product code e.g. BS007S would be a silver plated key ring.

Other plating can be applied if required. Please enquire through your distributor.

*gold products marked with "A" are available in antique gold and antique silver. Please specify if you require this plating by adding /AG or /AS at the end of the code.
